 Land greatly rolling, rich 2<sup>nd</sup> rate Timber. Buck  
 Elm. Ash. Poplar, &c. Underg<sup>d</sup>. Gypsum. Spice. &c.

The largest portion of the Land in this Township is of a thin quality of soil rather broken & third rate. The principal Timber is W. Oak. Whortleberry bushes were found in some places in the barrens. There is a great deal of surplus water in this Township.

Turkey Lake has been raised about five feet above its common level by reason of a Mile-dam, which had been erected at the outlet on Turkey Creek; in consequence of which a large body of Marshy prairie and some finely timbered land belonging to government, has been inundated.

At the period when it was meandered, owing to the long continued drought in the fall & summer & winter preceding, the Lake had subsided to something like 3 feet below its level in ordinary seasons, since the erection of the dam.

The Timber on the land overflowed is totally destroyed. Several hundred acres, it is believed has been rendered valueless in consequence of the erection of the Mile dam. This might be partially reclaimed by its removal.

The soil is from 1. to 3 inches deep, on the broken Barrens. On the rich timbered Land it is from 4 to 6 in. deep.

Turkey Lake & the Marshes with which it

## T 34 N. R. 7. E 2nd Mer. Indianan

it is surrounded. being locked up with ice and covered with snow rendered it impossible to observe the mouths of all the creeks & inlets emptying into it. which accounts for their not being all noted.
